

## Introducing ParFX Prime

Developed for the market by the market, and founded on specific guiding principles, ParFX brings renewed transparency and equality to global spot FX.

Now, ParFX Prime opens the platform to buy-side clients and bank customers that wish to utilise the credit of their Prime Bank to access ParFX's unique price discovery and liquidity.

ParFX Prime increases liquidity and the variety of trading strategies on the platform, providing opportunities for all participants in an orderly, efficient and equal manner.

Clients accessing the platform via ParFX Prime connect in the same way as core participants and enjoy these key benefits:

- Full trade transparency – Executing Broker, Prime Broker and Prime Client name give-up post-trade
- Genuinely level playing field, regardless of technological sophistication or financial strength – the result of an unique matching mechanism that applies the market's only meaningful randomised pause to all order submissions, amendments and cancellations
- Equal, clear brokerage charges for all users
- Low-cost and easy access through industry-standard FIX protocol API
